Economic News Release

Employment Situation of Veterans News Release

For release 10:00 a.m. (EDT) Thursday, March 19, 2020

USDL-20-0452

Technical information: (202) 691-6378 * cpsinfo@bls.gov * www.bls.gov/cps
Media contact: (202) 691-5902 * PressOffice@bls.gov

(NOTE: Population controls used in the weighting of state data for veterans and nonveterans in tables 6A and 6B of the Employment Situation of Veterans 2019 news release were incorrect. All differences were minor and not statistically significant, and have been corrected as of April 22, 2020.)

EMPLOYMENT SITUATION OF VETERANS -- 2019

The unemployment rate for veterans who served on active duty in the U.S. Armed Forces at any time since September 2001--a group referred to as Gulf War-era II veterans--was 3.5 percent in 2019, little changed from 2018, the U.S. Bureau of Labor Statistics reported today. The jobless rate for all veterans declined in 2019 to 3.1 percent. In August 2019, 41 percent of Gulf War-era II veterans had a service-connected disability, compared with 25 percent of all veterans.

This information was obtained from the Current Population Survey (CPS), a monthly sample survey of about 60,000 eligible households that provides data on employment, unemployment, and persons not in the labor force in the United States. Data about veterans are collected monthly in the CPS; these monthly data are the source of the 2019 annual averages presented in this news release. In August 2019, a supplement to the CPS collected additional information about veterans on topics such as service-connected disability and veterans' current or past Reserve or National Guard membership. Information from the supplement is also presented in this news release. The supplement was co-sponsored by the U.S. Department of Veterans Affairs and the U.S. Department of Labor's Veterans' Employment and Training Service. For more information, see the Technical Note in this news release.

Highlights from the 2019 data:

- The unemployment rate for male veterans declined to 3.0 percent in 2019, and the rate for female veterans (3.7 percent) changed little over the year. The unemployment rate for male veterans was not statistically different from the rate for female veterans. (See table A.)
- Among the 284,000 unemployed veterans in 2019, 56 percent were ages 25 to 54, 39 percent were age 55 and over, and 5 percent were ages 18 to 24. (See table 2A.)
- Veterans with a service-connected disability had an unemployment rate of 4.8 percent in August 2019, not statistically different from the rate for veterans with no disability (3.7 percent). (See table 7.)
- Gulf War-era II veterans who reported a service-connected disability rating of less than 30 percent were much more likely to be in the labor force than those with a rating of 60 percent or higher (92.2 percent, compared with 61.2 percent in August 2019). (See table 7.)
- In August 2019, 31 percent of employed veterans with a service-connected disability worked in the public sector, compared with 17 percent of veterans with no disability and 13 percent of nonveterans. (See table 8.)
- In 2019, the unemployment rate of veterans varied across the country, ranging from 0.9 percent in Maryland to 6.1 percent in Montana. (See table 6A.)

The Veteran Population

In 2019, 18.8 million men and women were veterans, accounting for about 8 percent of the civilian noninstitutional population age 18 and over. Of all veterans, 1 in 10 were women. In the survey, veterans are defined as men and women who have previously served on active duty in the U.S. Armed Forces and who were civilians at the time these data were collected. Veterans are much more likely to be men than are nonveterans, and they also tend to be older. In part, this reflects the characteristics of veterans who served during World War II, the Korean War, and the Vietnam era, all of whom are now over 60 years old. Veterans who served during these wartime periods accounted for 38 percent (7.2 million) of the total veteran population in 2019. Thirty-nine percent of veterans (7.4 million) served during Gulf War-era I (August 1990 to August 2001) or Gulf War-era II (September 2001 to present). Twenty-two percent (4.2 million) served outside the designated wartime periods. (See tables 1 and 2A.)

Gulf War-era II Veterans

In 2019, there were 4.3 million veterans who had served during Gulf War-era II (September 2001 to present). Seventeen percent of these veterans were women, compared with 3.5 percent of veterans from World War II, the Korean War, and the Vietnam era. About two-thirds of all Gulf War-era II veterans were between the ages of 25 and 44. (See tables 1 and 2A.)

Among Gulf War-era II veterans, the unemployment rate for men (3.4 percent) was lower than the rate for women (4.7 percent) in 2019. The unemployment rates for men and women were little changed over the year. (See table A.)

In 2019, the unemployment rate for male Gulf War-era II veterans, at 3.4 percent, was little different from the rate for male nonveterans, at 3.7 percent. Among men ages 25 to 34, Gulf War-era II veterans had a lower unemployment rate (3.1 percent) than did nonveterans (3.8 percent). Among men ages 35 to 44, however, Gulf War-era II veterans had a higher unemployment rate (3.6 percent) than did nonveterans (2.5 percent). (See table 2B.)

The unemployment rate for female Gulf War-era II veterans was 4.7 percent in 2019, higher than the rate for female nonveterans (3.5 percent). By age, unemployment rates for female Gulf War-era II veterans and nonveterans were not statistically different, with one exception: 35- to 44-year-old female Gulf War-era II veterans had a rate of 5.0 percent, higher than the rate of 2.9 percent for their nonveteran counterparts. (See table 2C.)

Employed Gulf War-era II veterans were about twice as likely to work in the public sector in 2019 as employed nonveterans--25 percent and 13 percent, respectively. Among the employed, 15 percent of Gulf War-era II veterans worked for the federal government, compared with 2 percent of nonveterans. (See table 5.)

In August 2019, 42 percent of Gulf War-era II veterans reported serving in Iraq, Afghanistan, or both locations. These veterans had an unemployment rate of 4.5 percent, little different from the rate for Gulf War-era II veterans who served elsewhere (4.8 percent). (See table 10.)

Gulf War-era I Veterans

In 2019, of the 3.1 million veterans who served during Gulf War-era I (August 1990 to August 2001), the proportion who were women (16 percent) was similar to that of Gulf War-era II veterans (17 percent). All Gulf War-era I veterans were age 35 and over in 2019, compared with 57 percent of Gulf War-era II veterans. Nearly half of Gulf War-era I veterans were ages 45 to 54, 22 percent were ages 35 to 44, 22 percent were ages 55 to 64, and 10 percent were age 65 and over. (See tables 1 and 2A.)

In 2019, the unemployment rates for male and female Gulf War-era I veterans were little different (2.7 percent and 2.0 percent, respectively). The rates for male and female Gulf War-era I veterans were lower than those of their Gulf War-era II counterparts, at 3.4 percent for male Gulf War-era II veterans and 4.7 percent for female Gulf War-era II veterans. The difference in unemployment rates reflects, at least in part, the older age profile of veterans who served during Gulf War-era I. Younger people--whether veterans or nonveterans--tend to have higher unemployment rates than older people. (See tables 2B and 2C.)

Veterans of Other Service Periods

In 2019, 4.2 million veterans had served on active duty during "other service periods," mainly between the Korean War and the Vietnam era and between the Vietnam era and Gulf War-era I. All veterans from this period of service were age 45 and over at the time of the survey. Thirteen percent of these veterans were ages 45 to 54 in 2019, 48 percent were ages 55 to 64, and 39 percent were age 65 and over. (See table 2A.)

In 2019, 1 in 10 veterans of other service periods were women. Among veterans of other service periods, the unemployment rate for men (2.8 percent) was not statistically different from the rate for women (3.9 percent). The rate for men declined over the year, while the rate for women was little different. (See table 1.)

Veterans with a Service-connected Disability

In August 2019, 4.7 million veterans, or 25 percent of the total, had a service-connected disability. Veterans with a service-connected disability are assigned a disability rating by the U.S. Department of Veterans Affairs or the U.S. Department of Defense. Ratings range from 0 to 100 percent, in increments of 10 percentage points, depending on the severity of the condition. (See table 7.)

The unemployment rate for veterans with a service-connected disability was 4.8 percent in August 2019, not statistically different from the rate for veterans with no disability (3.7 percent). The labor force participation rate for veterans with a service-connected disability (47.5 percent) was also not statistically different from the rate for veterans with no disability (48.1 percent).

Among veterans with a service-connected disability, 26 percent reported a disability rating of less than 30 percent, while another 44 percent had a rating of 60 percent or higher. In August 2019, veterans with a service-connected disability rating of less than 30 percent were much more likely to be in the labor force than those with a rating of 60 percent or higher (53.8 percent and 40.8 percent, respectively). The unemployment rate for veterans with a disability rating of less than 30 percent was 3.0 percent, lower than the rate for those with a disability rating of 60 percent or higher (8.6 percent).

Among veterans who served during Gulf War-era II, 41 percent (1.8 million) reported a service-connected disability in August 2019. In August 2019, 72.7 percent of all Gulf War-era II veterans with a service-connected disability were in the labor force, lower than the 84.8 percent for veterans from this period with no service-connected disability. Among Gulf War-era II veterans, the unemployment rate for those with a service-connected disability was 5.5 percent, not statistically different from those with no disability (4.4 percent).

Among Gulf War-era II veterans with a service-connected disability, 17 percent reported a disability rating of less than 30 percent and another 55 percent reported a disability rating of 60 percent or higher in August 2019. Gulf War-era II veterans who reported a disability rating of less than 30 percent were much more likely to be in the labor force than those with a rating of 60 percent or higher (92.2 percent, compared with 61.2 percent). The unemployment rate for veterans with a disability rating of less than 30 percent was 2.3 percent in August 2019, much lower than the rate for those with a disability rating of 60 percent or higher

(9.4 percent).

In August 2019, 26 percent (768,000) of veterans who served during Gulf War-era I reported a service-connected disability. Their labor force participation rate (62.6 percent) was lower than the rate for veterans who did not have a disability (81.4 percent). The unemployment rate for Gulf War-era I veterans with a service-connected disability (2.5 percent) was not statistically different from that for Gulf War-era I veterans without a service-connected disability (3.4 percent).

Fifteen percent (641,000) of veterans who served during other service periods reported a service-connected disability in August 2019. The labor force participation rate of these veterans (38.2 percent) was lower than their counterparts without a service-connected disability (47.0 percent), while the unemployment rates were not statistically different for veterans with a service-connected disability (5.1 percent) and those with no disability (3.6 percent).

Regardless of period of service, many veterans with a service-connected disability worked in the public sector. In August 2019, 31 percent of employed veterans with a disability worked in federal, state, or local government, compared with 17 percent of veterans with no disability and 13 percent of nonveterans. Twenty percent of employed veterans with a disability worked for the federal government, compared with 8 percent of veterans with no disability and 2 percent of nonveterans. (See table 8.)

Reserve and National Guard Membership

In August 2019, one-third of Gulf War-era veterans (August 1990 to present) were current or past members of the Reserve or National Guard. The labor force participation rate was higher for veterans who were current or past members of the Reserve or National Guard (81.9 percent) than for veterans who were never members (76.6 percent). Among Gulf War-era veterans, those who were current or past members of the Reserve or National Guard had an unemployment rate (4.7 percent), not statistically different from that for those who had never been members (3.9 percent). (See table 9.)

Table A. Employment status of the civilian noninstitutional population 18 years and over by veteran status, period of service, and sex, 2018-2019 annual averages

[Numbers in thousands]

Veteran status and period of service	2018			2019		
	Total	Men	Women	Total	Men	Women
TOTAL VETERANS						
Civilian noninstitutional population	19,201	17,335	1,866	18,822	16,938	1,884
Civilian labor force	9,453	8,320	1,133	9,270	8,169	1,101
Participation rate	49.2	48.0	60.7	49.2	48.2	58.4
Employed	9,127	8,027	1,099	8,986	7,926	1,060
Employment-population ratio	47.5	46.3	58.9	47.7	46.8	56.2
Unemployed	326	292	34	284	243	41
Unemployment rate	3.5	3.5	3.0	3.1	3.0	3.7
Not in labor force	9,748	9,015	732	9,552	8,769	784
Gulf War-era II veterans						
Civilian noninstitutional population	4,149	3,444	704	4,328	3,602	726
Civilian labor force	3,358	2,853	505	3,468	2,974	495
Participation rate	80.9	82.8	71.7	80.1	82.6	68.1
Employed	3,229	2,742	487	3,345	2,874	471
Employment-population ratio	77.8	79.6	69.1	77.3	79.8	64.9

Unemployment rate	3.8	3.9	3.5	3.5	3.4	4.7
Not in labor force	791	592	200	860	628	232
NONVETERANS						
Civilian noninstitutional population	229,673	102,817	126,857	231,555	103,960	127,595
Civilian labor force	150,489	76,774	73,715	152,188	77,491	74,697
Participation rate	65.5	74.7	58.1	65.7	74.5	58.5
Employed	144,797	73,824	70,972	146,763	74,655	72,107
Employment-population ratio	63.0	71.8	55.9	63.4	71.8	56.5
Unemployed	5,693	2,950	2,743	5,425	2,835	2,590
Unemployment rate	3.8	3.8	3.7	3.6	3.7	3.5
Not in labor force	79,184	26,043	53,141	79,367	26,469	52,898

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Gulf War-era II veterans served on active duty anywhere in the world sometime since September 2001. Nonveterans never served on active duty in the U.S. Armed Forces. Effective with data for November 2017, estimates for veterans incorporate population controls derived from an updated Department of Veterans Affairs population model.

Technical Note

The data in this release were collected through the Current Population Survey (CPS). The CPS--a monthly survey of about 60,000 eligible households conducted by the U.S. Census Bureau for the Bureau of Labor Statistics--obtains information on employment and unemployment among the nation's civilian noninstitutional population age 16 and over.

Most of the data in this release are annual averages, compiled from the results of the monthly survey. In August, a supplement to the CPS collected additional information about veterans on topics such as service-connected disability, veterans' Reserve or National Guard status, and veterans who served in Iraq and/or Afghanistan. The supplement was co-sponsored by the U.S. Department of Veterans Affairs and by the U.S. Department of Labor's Veterans' Employment and Training Service. Questions were asked of persons 17 years of age and older regarding their prior service in the U.S. Armed Forces. Data are tabulated for persons 18 years of age and older.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Definitions

The definitions underlying the data in this release are as follows:

Veterans are men and women who previously served on active duty in the U.S. Armed Forces and who were civilians at the time they were surveyed. Members of the Reserve and National Guard are counted as veterans if they had ever been called to active duty. Persons who are on active duty at the time of the survey are outside the scope of the survey and thus not in the estimates shown here, as are persons who reside in institutions, such as nursing homes and prisons.

Nonveterans are men and women who never served on active duty in the U.S. Armed Forces.

World War II, Korean War, Vietnam-era, and Gulf War-era veterans are men and women who served in the U.S. Armed Forces during these periods of service, regardless of where in the world they served. Veterans who served in more than one wartime period are classified in the most recent one.

Veterans of other service periods are men and women who served in the U.S. Armed Forces at any time other than World War II, the Korean War, the Vietnam era, or the Gulf War era. Although U.S. Armed Forces were engaged in several armed conflicts during other service periods, these conflicts were more limited in scope and included a smaller proportion of the Armed Forces than the selected wartime periods. Veterans who served during one of the selected wartime periods and during another period are classified in the wartime period.

Veteran status is obtained from responses to the question, "Did you ever serve on active duty in the U.S. Armed Forces?"

Period of service identifies when a veteran served in the Armed Forces, but not the location of their service. It is obtained from answers to the question asked of veterans, "When did you serve on active duty in the U.S. Armed Forces?"

The following service periods are identified:

Gulf War era II -- September 2001-present
 Gulf War era I -- August 1990-August 2001
 Vietnam era -- August 1964-April 1975
 Korean War -- July 1950-January 1955
 World War II -- December 1941-December 1946
 Other service periods -- All other time periods

Veterans could have served anywhere in the world during these periods of service. Veterans are counted only in one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. The period-of-service definitions are modified occasionally to reflect changes in law, regulations, and program needs of the survey sponsors.

Veterans who served in Iraq, Afghanistan, or both are individuals who served in Iraq at any time since March 2003, in Afghanistan at any time since October 2001, or in both locations. Service in Iraq or Afghanistan is determined by answers to two questions: "Did you serve in Iraq, off the coast of Iraq, or did you fly missions over Iraq at any time since March 2003?" and "Did you serve in Afghanistan, or did you fly missions over Afghanistan, at any time since October 2001?"

Presence of service-connected disability is determined by answers to the question, "Has the Department of Veterans Affairs (VA) or Department of Defense (DoD) determined that you have a service-connected disability, that is, a health condition or impairment caused or made worse by any of your military service?"

Service-connected disability rating is based on answers to the question, "What is your current service-connected disability rating?" Answers can range from 0 to 100 percent, in increments of 10 percentage points. Ratings are determined by the VA or DoD from a rating schedule published in the Code of Federal Regulations, Title 38, "Pensions, Bonuses, and Veterans' Relief," Part 4--"Schedule for Rating Disabilities." The rating schedule is "primarily a guide in the evaluation of

disability resulting from all types of diseases and injuries encountered as a result of or incident to military service. The percentage ratings represent as far as can practicably be determined the average impairment in earning capacity resulting from such diseases and injuries and their residual conditions in civil occupations."

Part 4 contains a listing of hundreds of possible disorders and assigns ratings of 0 through 100 percent, with instructions for rating multiple disorders.

Reserve and National Guard membership refers only to Gulf War-era veterans who are current or past members of the Reserve or National Guard. Members of the Reserve and National Guard are counted as veterans if they had ever been called to active duty. These data do not refer to all persons who may have ever served in the Reserve or National Guard. Reserve or National Guard status is obtained from answers to two questions. Gulf War-era veterans were asked: "Was any of your active service the result of a call-up from the Reserve or National Guard?" If the answer was no, they were asked, "Have you ever been a member of the Reserve or National Guard?" A 'yes' response to either question classified persons as "Current or past member of the Reserve or National Guard." A 'no' response to the latter question classified persons as "Never a member of the Reserve or National Guard."

Reliability of the estimates

Statistics based on the CPS are subject to both sampling and nonsampling error. When a sample, rather than the entire population, is surveyed, there is a chance that the sample estimates will differ from the true population values they represent. The component of this difference that occurs because samples differ by chance is known as sampling error, and its variability is measured by the standard error of the estimate. There is about a 90-percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.6 standard errors from the true population value because of sampling error. BLS analyses are generally conducted at the 90-percent level of confidence.

The CPS data also are affected by nonsampling error. Nonsampling error can occur for many reasons, including the failure to sample a segment of the population, the inability to obtain information for all respondents in the sample, the inability or unwillingness of respondents to provide correct information, and errors made in the collection or processing of the data.

Information about the reliability of national data from the CPS and estimating standard errors is available at www.bls.gov/cps/documentation.htm#reliability.

For a discussion of the reliability of state estimates from the CPS, such as those in tables 6A and 6B of this release, see <https://www.bls.gov/opub/geographic-profile/home.htm>.

Comparability of estimates

Effective with data for November 2017, estimates for veterans incorporate population controls derived from an updated Department of Veterans Affairs' population model. In accordance with usual practice, BLS did not revise estimates for previous years. Information about the updated veteran population model is available from the Department of Veterans Affairs at https://www.va.gov/vetdata/docs/Demographics/New_Vetpop_Model/Vetpop16_Overview.pdf.

Table 1. Employment status of persons 18 years and over by veteran status, period of service, sex, race, and Hispanic or Latino ethnicity, 2019 annual averages

[Numbers in thousands]

Veteran status, period of service, sex, race, and Hispanic or Latino ethnicity	Civilian noninstitutional population	Civilian labor force						Not in labor force
		Total	Percent of population	Employed		Unemployed		
				Total	Percent of population	Total	Percent of labor force	
TOTAL								
Total, 18 years and over	250,377	161,458	64.5	155,749	62.2	5,709	3.5	88,919
Veterans	18,822	9,270	49.2	8,986	47.7	284	3.1	9,552
Gulf War era, total	7,399	5,808	78.5	5,624	76.0	183	3.2	1,591
Gulf War era II	4,328	3,468	80.1	3,345	77.3	123	3.5	860
Gulf War era I	3,070	2,339	76.2	2,279	74.2	60	2.6	731
WW II, Korean War, and Vietnam era	7,213	1,479	20.5	1,437	19.9	42	2.8	5,735
Other service periods	4,210	1,983	47.1	1,925	45.7	59	3.0	2,227

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Nonveterans never served on active duty in the U.S. Armed Forces. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. Estimates for the above race groups (White, Black or African American, and Asian) do not sum to totals because data are not presented for all races. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 35,000).

Veteran status, period of service, sex, race, and Hispanic or Latino ethnicity	Civilian noninstitutional population	Civilian labor force						Not in labor force

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Nonveterans never served on active duty in the U.S. Armed Forces. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. Estimates for the above race groups (White, Black or African American, and Asian) do not sum to totals because data are not presented for all races. Persons whose ethnicity is identified as Hispanic or Latino may be of any race. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 35,000).

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Nonveterans never served on active duty in the U.S. Armed Forces. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 35,000).

Footnotes

(1) Total includes a small number of unpaid family workers, not shown separately.

(2) Includes self-employed workers whose business are incorporated.

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Nonveterans never served on active duty in the U.S. Armed Forces. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period.

Table 7. Employment status of veterans 18 years and over by presence of service-connected disability, reported disability rating, period of service, and sex, August 2019, not seasonally adjusted

[Numbers in thousands]

Presence of disability, reported disability rating, period of service, and sex	Civilian noninstitutional population	Civilian labor force						Not in labor force
		Total	Percent of population	Employed		Unemployed		
				Total	Percent of population	Total	Percent of labor force	

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. A service-connected disability is a health condition or impairment caused or made worse by military service. The associated disability rating, which can range from 0 to 100 percent, is determined from a rating schedule published in the U.S. Code of Federal Regulations, "Title 38." More information appears in the Technical Note of this release. Beginning with data for August 2015, estimates from the veterans supplement reflect a change in the weighting methodology. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 75,000).

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Veterans could have served anywhere in the world during these periods of service: Gulf War era II (September 2001-present), Gulf War era I (August 1990-August 2001), Vietnam era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946), and other service periods (all other time periods). Veterans are counted in only one period of service, their most recent wartime period. Veterans who served in more than one wartime period are classified in the most recent one. Veterans who served in both a wartime period and any other service period are classified in the wartime period. A service-connected disability is a health condition or impairment caused or made worse by military service. The associated disability rating, which can range from 0 to 100 percent, is determined from a rating schedule published in the U.S. Code of Federal Regulations, "Title 38." More information appears in the Technical Note of this release. Beginning with data for August 2015, estimates from the veterans supplement reflect a change in the weighting methodology. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 75,000).

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. The Gulf War era began in August 1990 and continues to the present day. It is divided into two periods of service: Gulf War era II (September 2001-present) and Gulf War era I (August 1990-August 2001). Veterans are counted in only one period of service, their most recent period. Data do not include Reserve and National Guard members who have never been called to Active Duty. Beginning with data for August 2015, estimates from the veterans supplement reflect a change in the weighting methodology. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 75,000).

Table 10. Employment status of Gulf War-era II veterans 18 years and over by location of service, August 2019, not seasonally adjusted

[Numbers in thousands]

Period of service and location	Civilian noninstitutional population	Civilian labor force						Not in labor force
		Total	Percent of population	Employed		Unemployed		
				Total	Percent of population	Number	Rate	
Total, Gulf War-era II veterans	4,411	3,520	79.8	3,356	76.1	164	4.7	891
Served in Iraq, Afghanistan, or both⁽¹⁾	1,855	1,433	77.3	1,369	73.8	64	4.5	422
Served in Iraq⁽²⁾	1,434	1,117	77.9	1,062	74.1	54	4.9	317
Served in Afghanistan⁽³⁾	930	727	78.2	700	75.3	27	3.7	203
Served in both locations⁽⁴⁾	509	411	80.7	394	77.4	17	4.1	98
Served elsewhere	2,556	2,086	81.6	1,987	77.7	100	4.8	470

(1) Refers to veterans who served in Iraq at anytime since March 2003 and veterans who served in Afghanistan at anytime since October 2001. Also includes veterans who served in both countries.

(2) Includes all veterans who served in Iraq at any time since March 2003, whether or not they also served in Afghanistan.

(3) Includes all veterans who served in Afghanistan at any time since October 2001, whether or not they also served in Iraq.

(4) Veterans who served in both Iraq and Afghanistan during the designated dates are also included in the totals of each location above.

NOTE: Veterans are men and women who served on active duty in the U.S. Armed Forces and were not on active duty at the time of the survey. Gulf War-era II veterans served anywhere in the world at any time since September 2001. Beginning with data for August 2015, estimates from the veterans supplement reflect a change in the weighting methodology. Dash indicates no data or data that do not meet publication criteria (values not shown where base is less than 75,000).
